A Programme for School Students

Dear Friends,

Sub : Know your Safe Food – Grow your Safe Food

In the month of October, AARDIP has organized a school based programme for students of class 6th to 10th in ten high schools of Andhra Pradesh, South India. The subject is tagged **“Know your Safe Food – Grow your Safe Food”** this has celebrated as a part of World Food Day event.

Students in five high schools have organized **“Tree Plantations”** in high school compounds. Around 500 fruit bearing trees / plants have been planted. The responsibilities of water the Plants protecting and caretaking were taken-up by an each student. The event on 16th October was very enthusiastic, we hope that by 2019th October students will enjoy the use of fruits like Papaya, Lemon etc.,

About 400 students have participated in this programme. Meetings organized to discuss and understand the safe food practices and to propagate which is safe and which is not safe.

In-fact AARDIP is working with 20 schools in Kurnool, A.P., India focusing on quality education through involving children / students in learning by doing. **“Know your Safe Food and Grow your Safe Food”** is our concept to educate students to be part of eco friendly future in which the people will enjoy the safe food and secured food.

World Food Day Events

Plantation Activity

Students have planted fruit bearing trees in school compound five varieties of fruit trees i.e., Papaya, Lemon, Guava, Pomegranate and Curry leaf have been planted in 5 high schools on World Food Day Celebration.

Excavation of Pits

Children involved in excavating the soil to make pits for plantation of trees both girls and boys equally participated in the activity.
